

intuitive[™] DININGWARE

enriching experiences.
well served.

Flatware that shows intuitive design can be beautiful

Flatware connects diners with the experience at the table, but it's often difficult to handle for those with reduced mobility or motor skills – and the utilitarian style of most adaptive flatware on the market feels far from a restaurant-like experience.

Libbey® Intuitive™ Diningware provides a more pleasing balance of form and function. Our specially designed flatware elegantly combines style and intuitive elements to ease handling while retaining a stunning appearance.

Ada

- Large ergonomically designed handles support easier, more natural feeling grip
- Stand-up dinner knife option omits the need to twist the wrist, helping reduce strain
- Arched handle is easier to pick up from beneath
- Lightweight design reduces stress on the hand and wrist

Clayton

- Ergonomic knob handle can be gripped “over-hand” to make eating less tiring and more pleasant
- Shorter handle provides greater leverage and control
- Hollow design is lighter weight and easier to hold
- Overall weight and balance reduces the effect of tremors while eating
- Spoon, fork and knife shapes facilitate easier scooping and cutting
